About Me

I'm a self-taught Flutter developer and research-driven programmer, passionate about building scalable, cross-platform apps. With end-to-end experience in design, development, and deployment, I follow industry best practices and have a strong interest in distributed systems and emerging technologies always striving to deliver reliable, high-quality solutions.

Technologies

Programming Languages: Dart, Java, C, CSS, HTML5

Libraries/Frameworks: Flutter, Bloc/Cubit, Riverpod, Provider, GetX, Dio, HTTP, Bootstrap

Databases: Firebase, SQLite (using sqflite package), Hive(NoSQL), Pandas

Tools & Technologies: IDEs and Editors, Debugging and Dev Tools, Version Control, CI/CD, Firebase, OAuth2.0, State Management Tools, Device Features, Deployment and Testing, Payment and Monetization

Architecture & Principles: RESTful APIs, SOLID Principles, Clean Architecture, MVC, OOP

Other skills: Communication, Adaptability, Time Management, Problem Solving, Self-Learning & Initiative

Projects

Cavlog – A Smart Barber Booking Ecosystem

[GitHub Link](#)
[User](#) | [Barber](#) | [Admin](#)

- Developed a real-time slot booking system with auto/manual slot generation and availability tracking.
- Designed an Admin Dashboard for managing barbers, services, analytics, and activity history.
- Built a Barber Panel with wallet integration, secure payments, social posting, and AI assistant (Gemini).
- Implemented user features like voice/location search, nearby discovery, booking, and live AI chat.
- Integrated calling, live chat, direction guidance, social engagement, and a full payment flow.
- Created an interactive revenue tracker to monitor earnings, trends, and service-wise performance.
- Tools Used: Flutter, Dart, Firebase, Stripe, BLoC, Clean Architecture, SOLID, REST APIs, Overpass API, Gemini API, Cloudinary, Secure Storage, Push Notifications.

Vaultora - Inventory Management

[GitHub](#) | [Live](#)

- Designed a modern, responsive UI for managing inventory with customizable revenue and sales reports.
- Integrated an activity tracker to monitor product flow and real-time performance summaries.
- Built a revenue dashboard with visual analytics, interactive trackers, and a flexible revenue generation module.
- Tools Used: Flutter, Dart, Custom Widgets, Hive(NoSQL), MVC Architecture.

Mini Projects

Todo Application - Task Manager with Activity Tracking

[GitHub](#) | [Live](#)

- Developed a feature-rich To-Do application with full functionality, leveraging Firebase Authentication and reactive state management with Bloc/Cubit
- Designed a clean UI with custom widgets for task display, status tracking, and detailed views.
- Integrated a real-time activity tracker for user performance and daily productivity summaries.
- Tools Used: Dart, Flutter, Bloc, Firebase, Custom Widgets, Clean Architecture, SOLID Principles.

Students Management system

[GitHub Link](#)

- Integrated a local SQL database for offline access and efficient structured data handling.
- Migrated from local to global state management using GetX and Provider, enhancing scalability.
- Built a dynamic search system and detailed content view for fast, user-friendly access.
- Tools used: Dart, Flutter, SQL Database, State Management (GetX, Provider), Custom Widgets, Clean Architecture, SOLID Principles

Education

Flutter Developer

July 2024 – Present

Brototype, Kochi, Kerala

[Certificate](#)

Government Polytechnic College, Meenangadi, Wayanad – Directorate of Technical Education (DTE), Kerala, in Civil Engineering

Jun 2021 – April 2024
